Team-Project Digitalization of Business Processes, AS 2024

**Smart Invoice**  
DIGITISING YOUR INVOICES

# Presentation Overview

**1**

## Background company

Explore the pain points and inefficiencies of the current manual invoicing process.

**2**

## AS-IS Process

Describe the existing invoicing workflow and identify areas for improvement.

**3**

## TO BE Process

Outline the proposed automated invoicing solution and its key features.

**4**

## Product Demo

# Background Information

## Nish Technologies

Nish Technologies, a company founded in 2023, basically a freelance people consulting company.

## Current Invoicing Process

Nish's current reliance on manual, manual, paper-based processes for timesheet creation and invoice generation is an ideal scenario for our digital solution.

## Digitalize Processes

Our SmartInvoice project aims to streamline and automate payroll processing, timesheet creation, creation, and invoice generation through digital solutions.

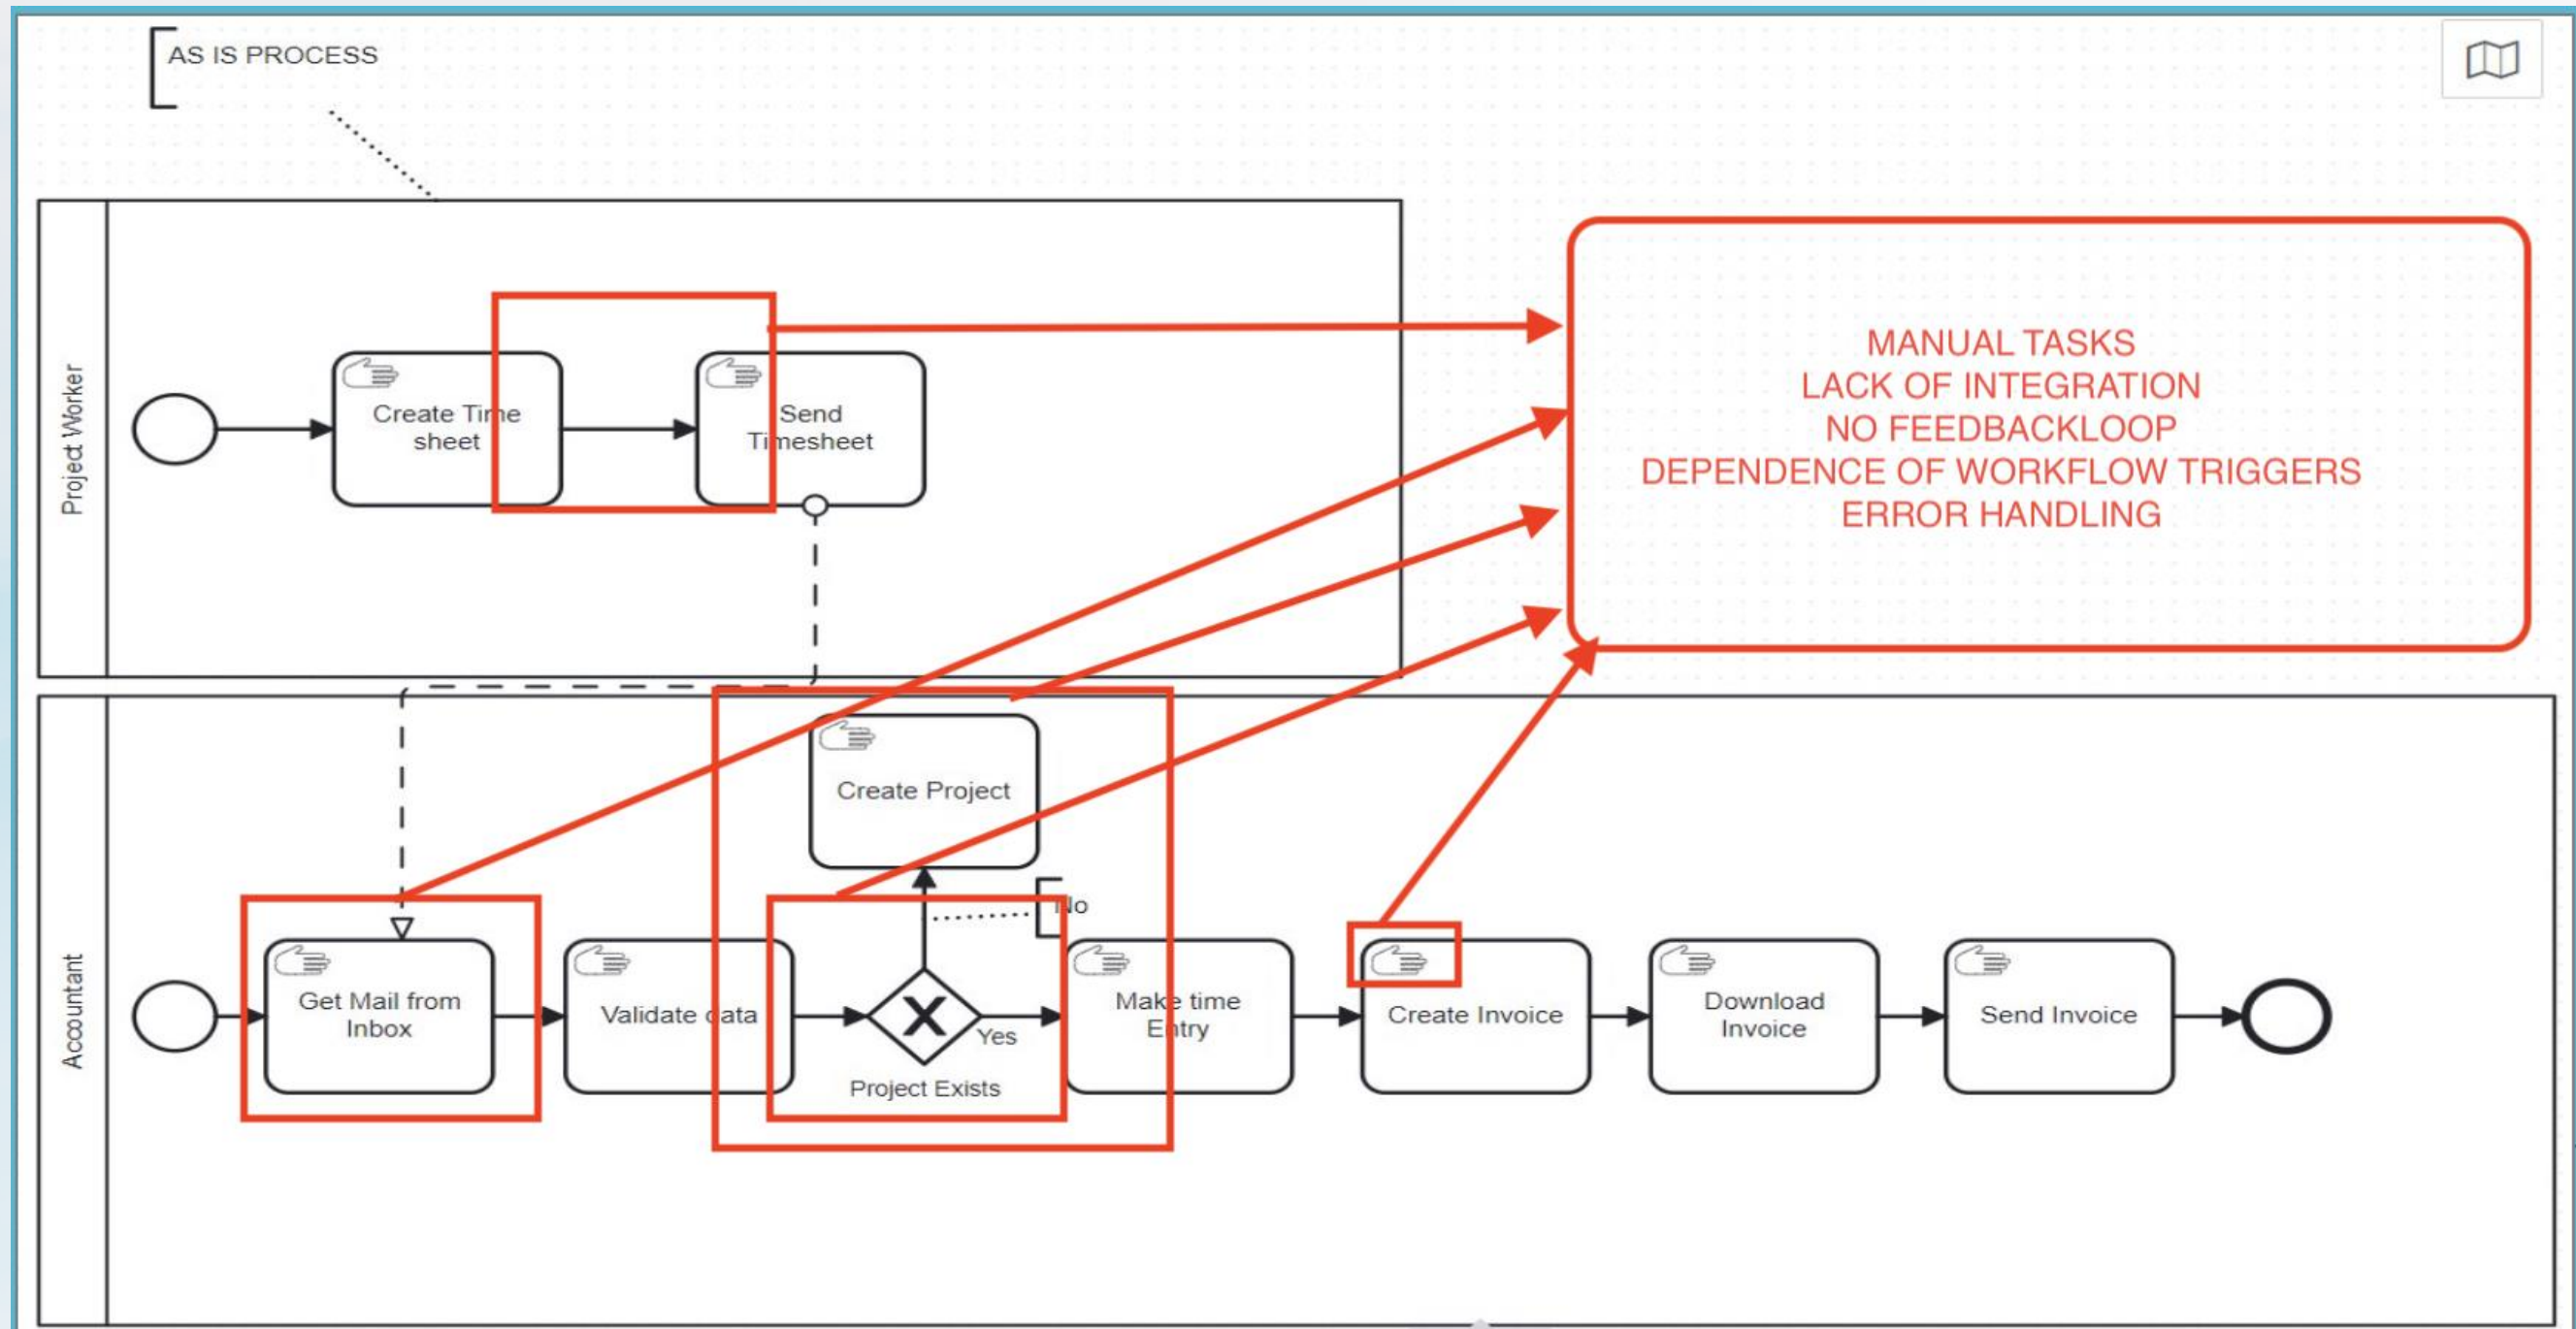

## Workflow Integration

We will digitalize the existing processes at Nish Technologies through the use of Camunda and Make, enhancing accuracy and accessibility.

## Mapping the As-Is Process

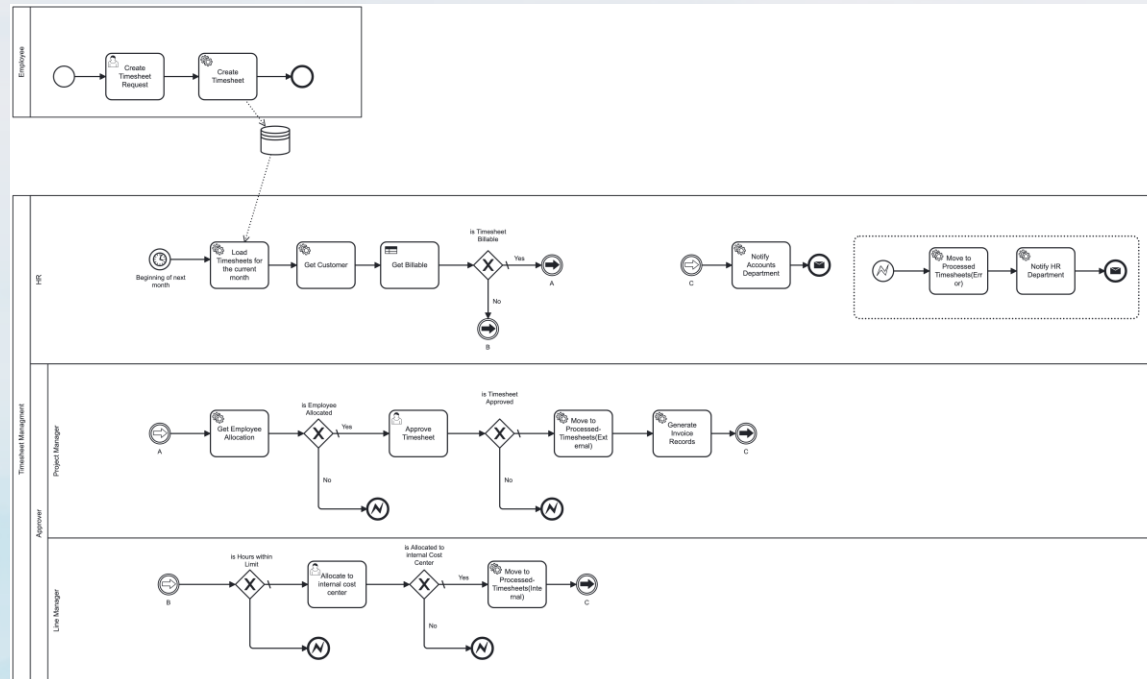

Since there is no existing process model or workflow integration at Nish, our team created a AS-IS BPMN process based on the information received.

# AS IS Process

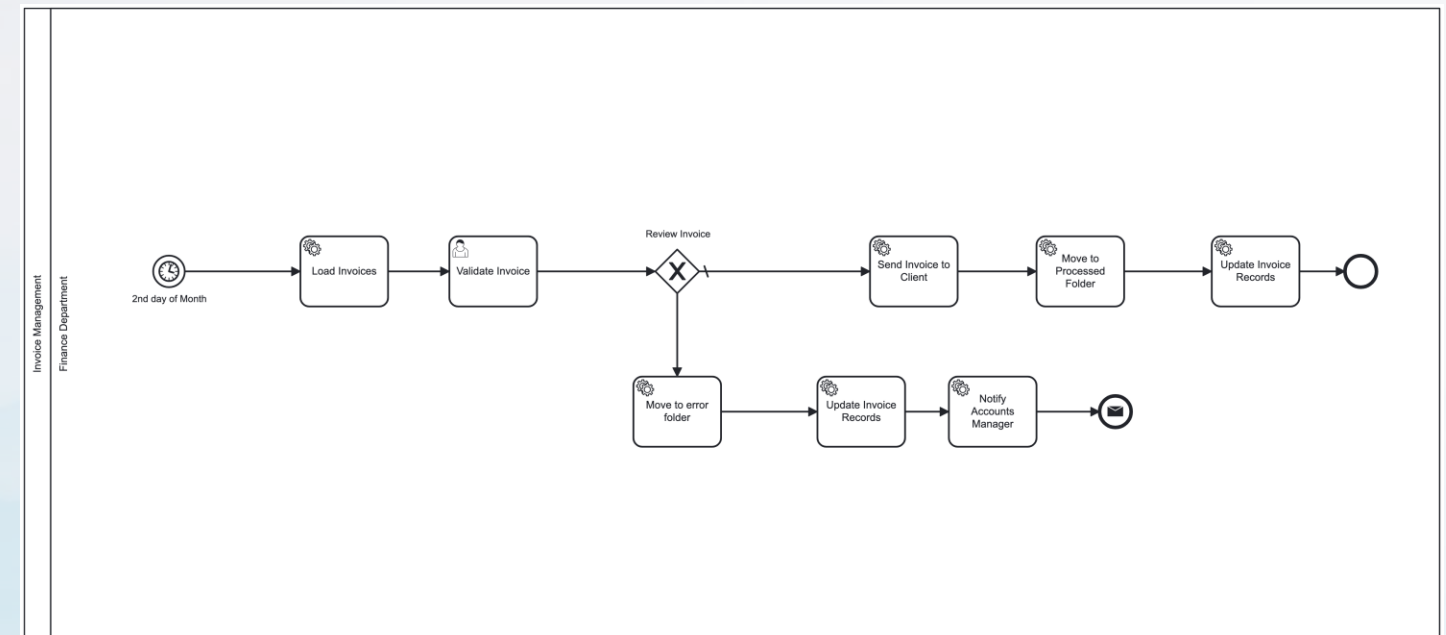

# TO BE PROCESS

## Timesheet Generation

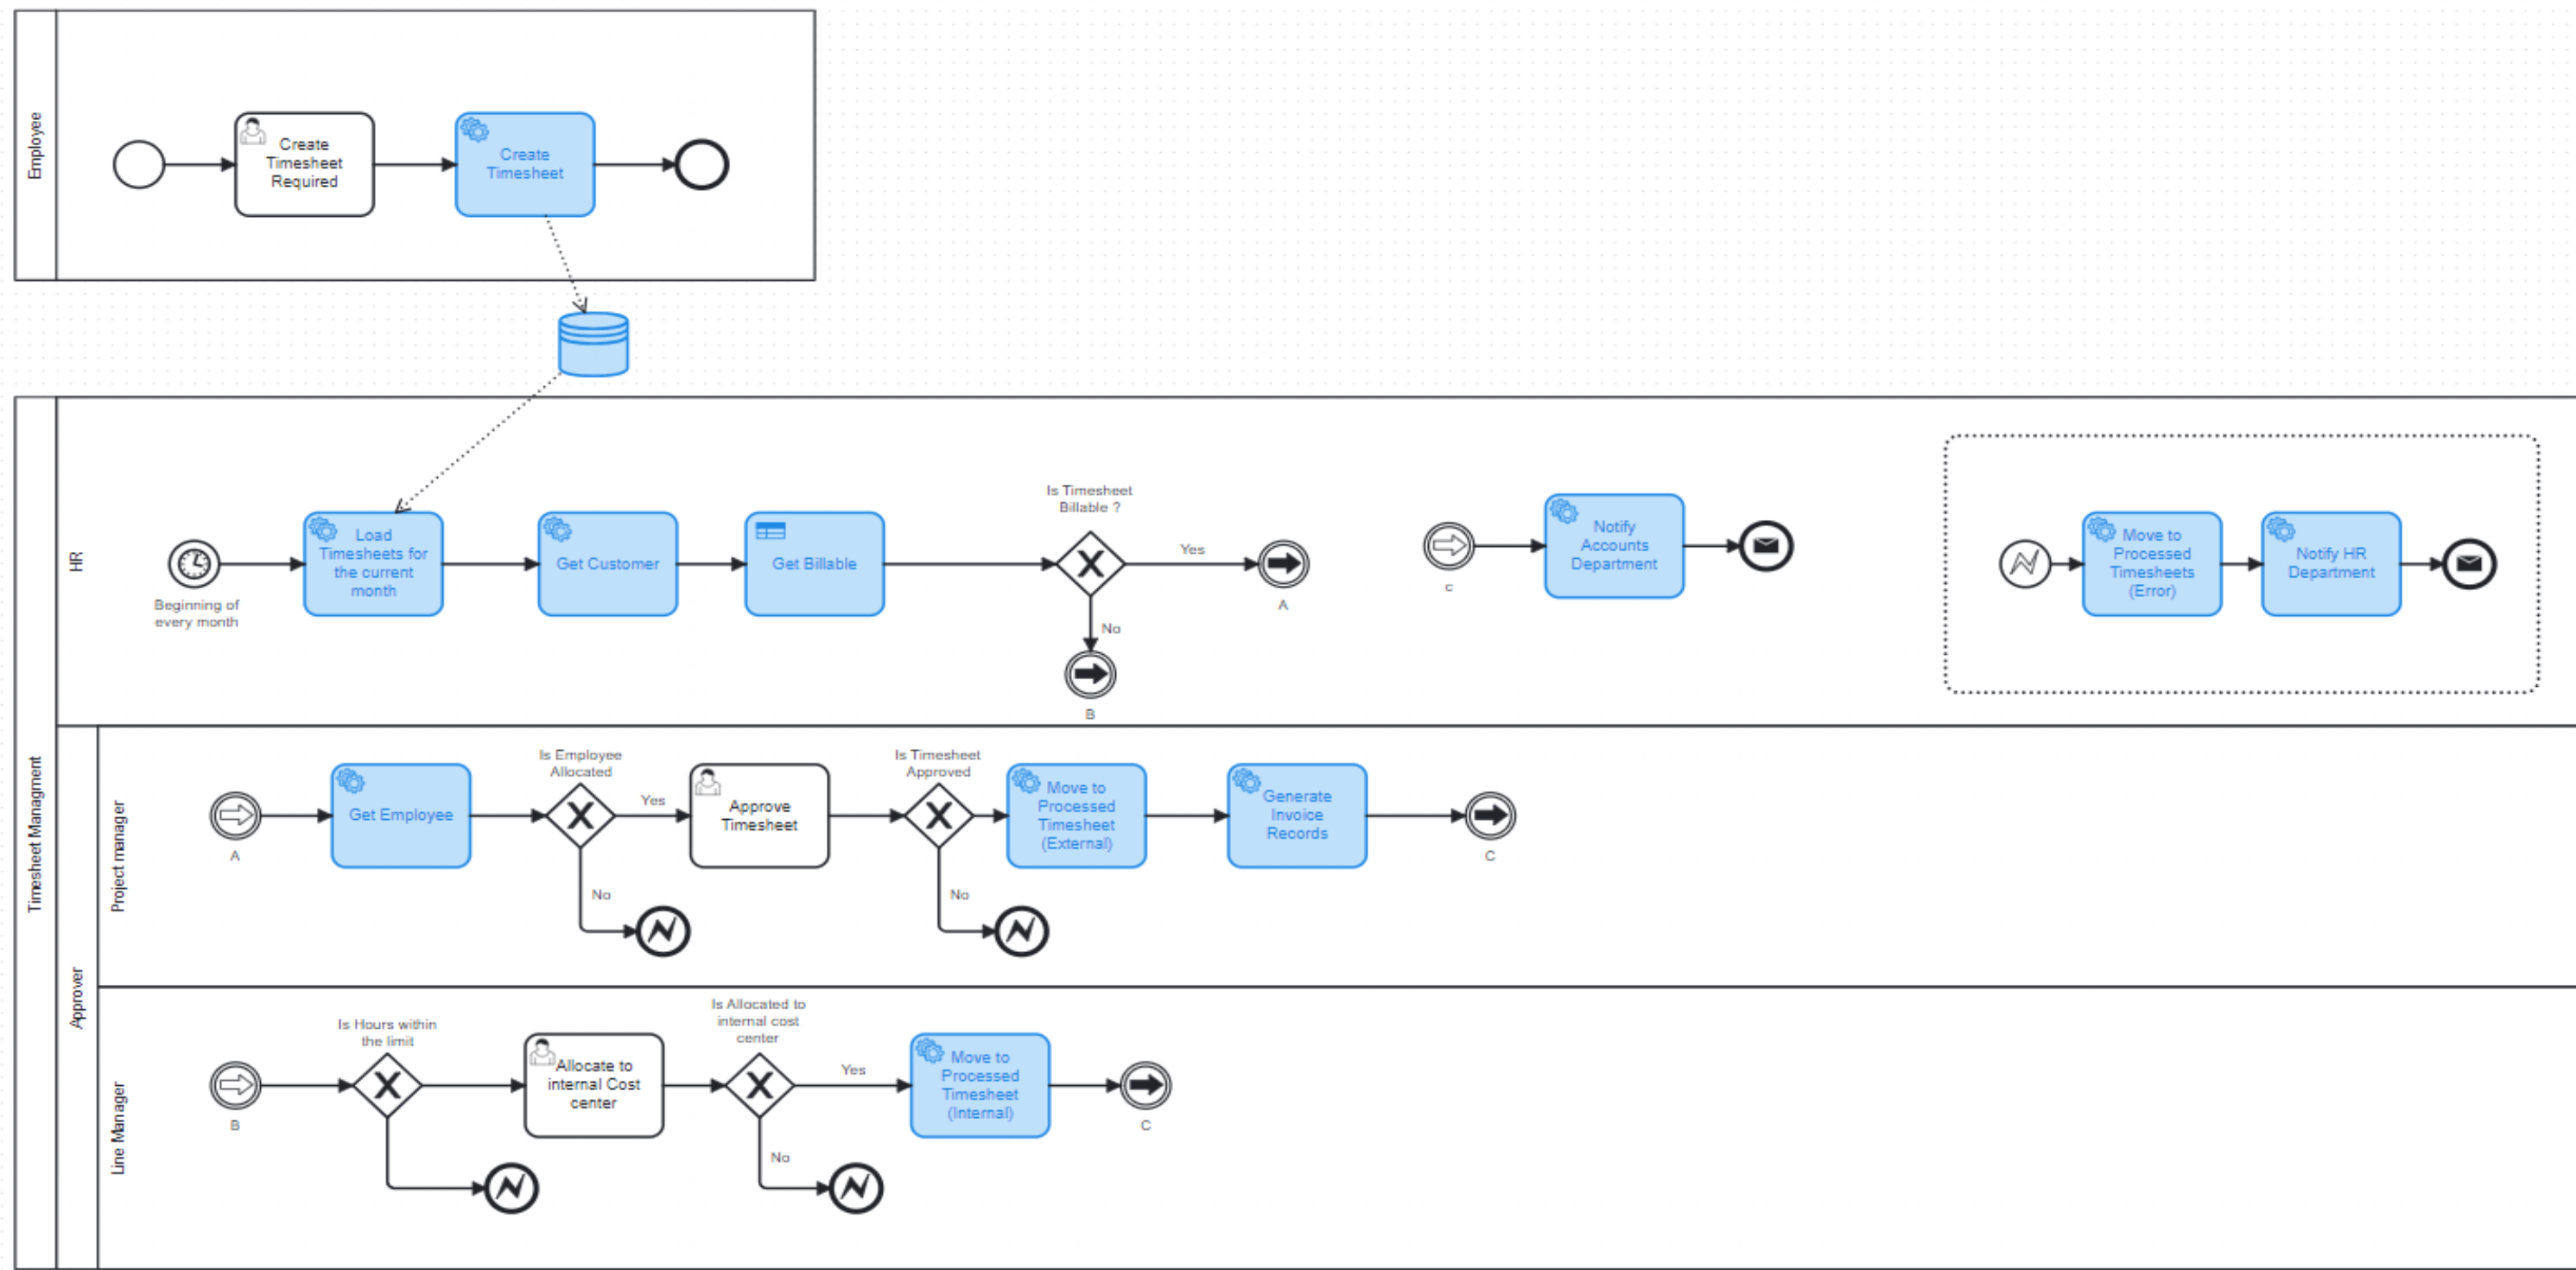

Seamlessly integrate customer information, item details, and pricing data into the invoicing system to eliminate manual data entry and reduce errors.

## Invoice Generation

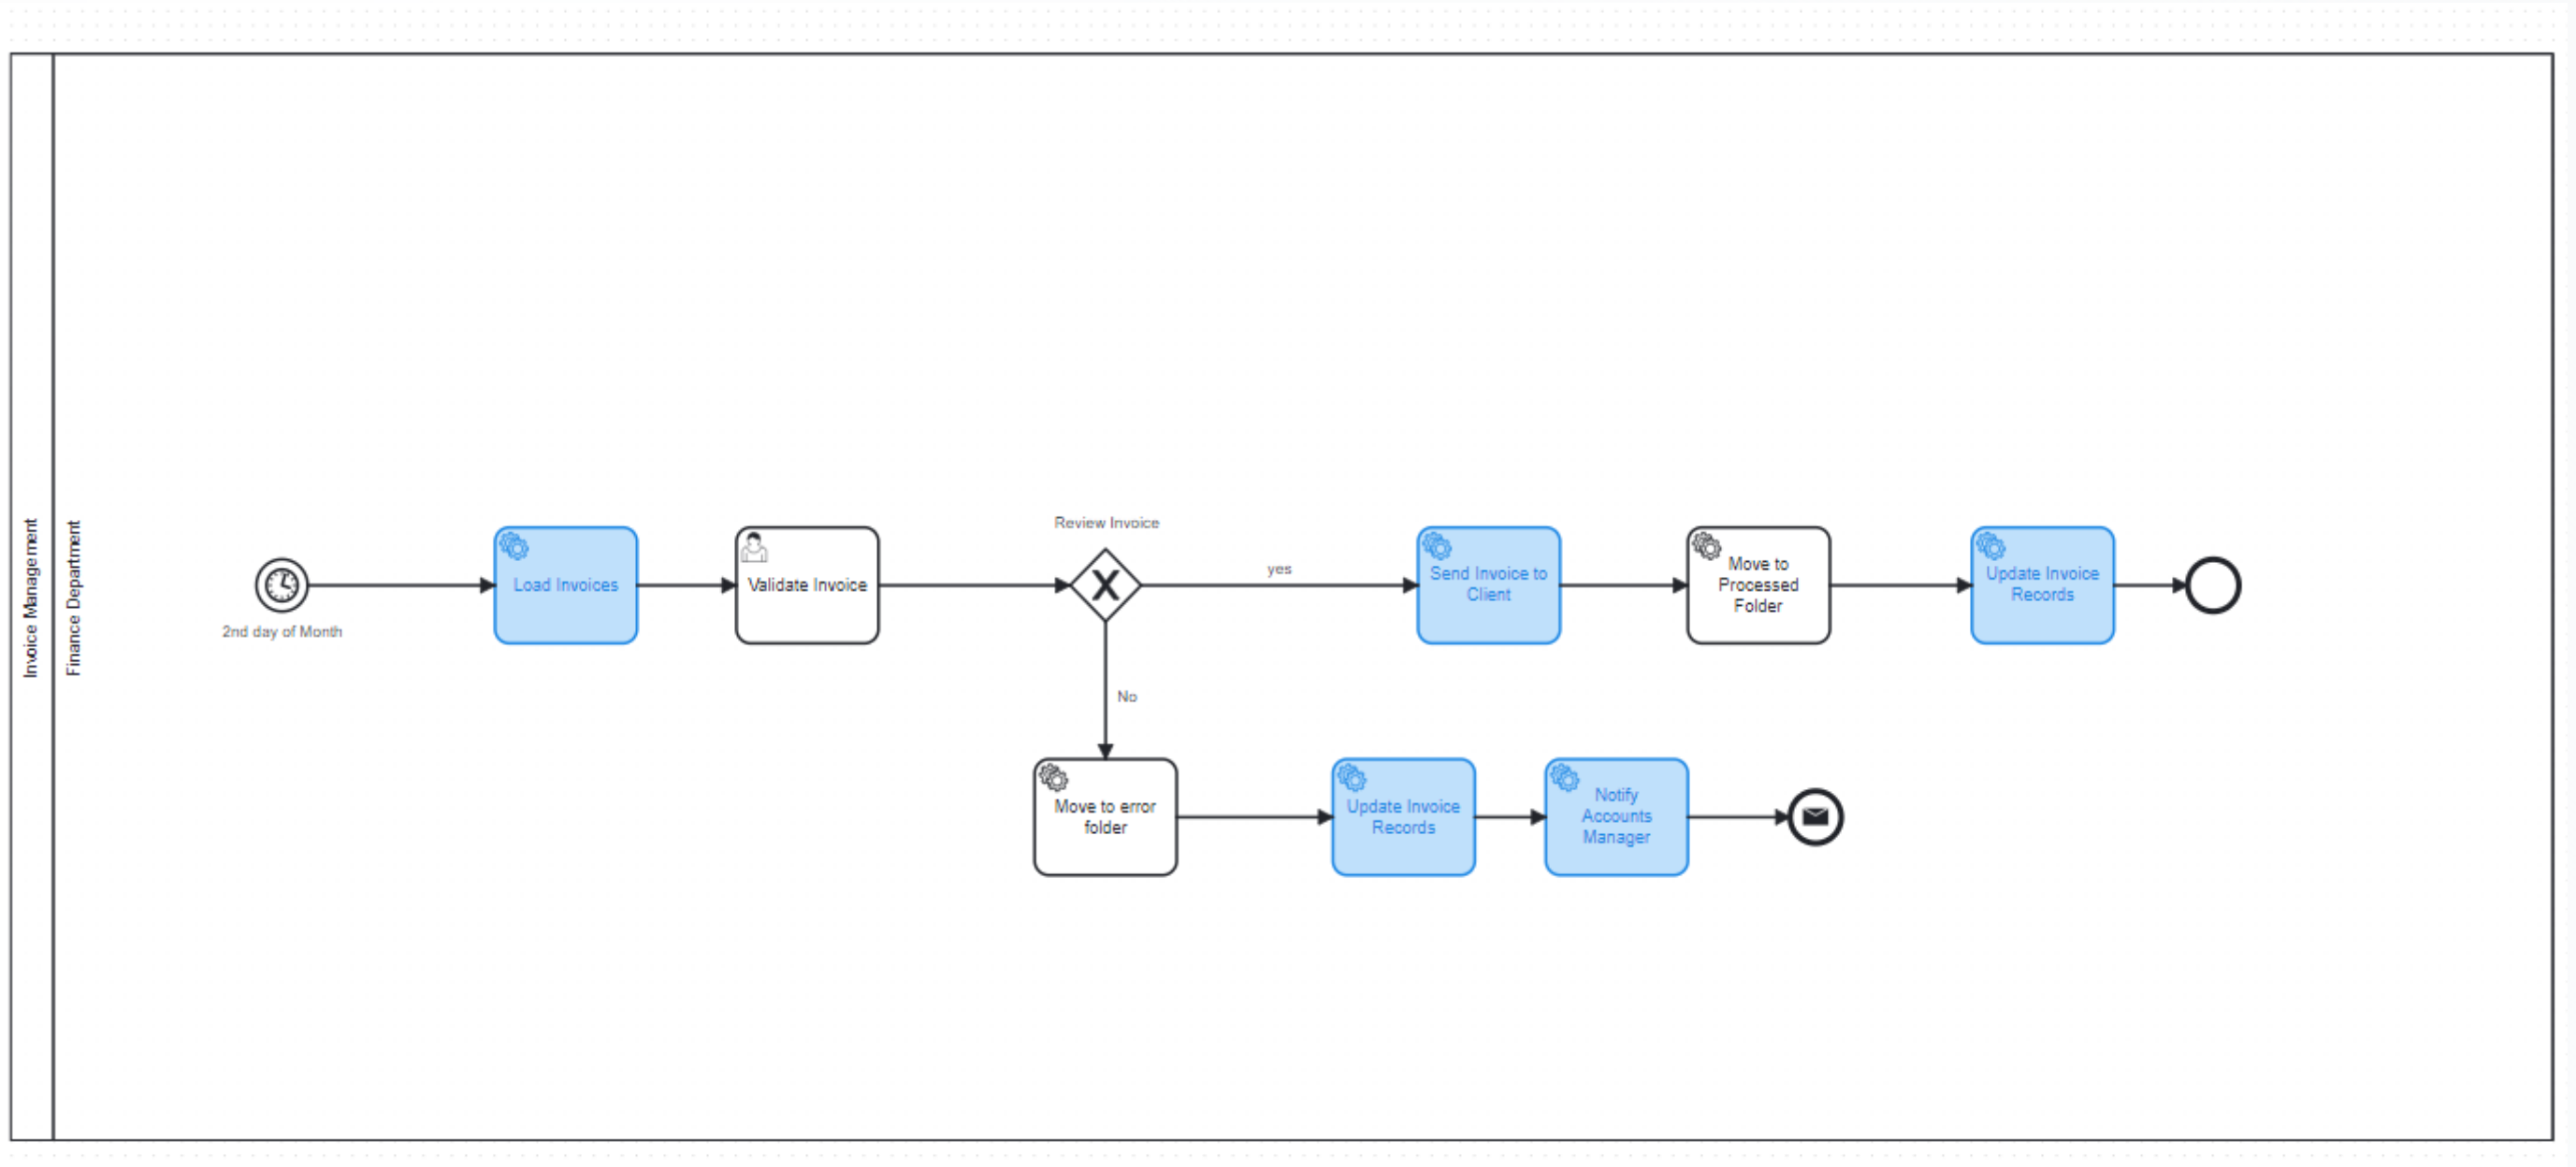

Implement a digital review and approval process that allows for efficient verification of invoice accuracy and secure authorization before distribution.

# Timesheet Approval Process

# Technical Product Demonstration

# Invoice Generation

# Technical Product Demonstration
